

NEW

Ai-ONE

ODYSSEY
#1 PUTTER ON TOUR.

These Odyssey Ai-One putters feature our Ai-One insert which delivers more consistent ball speeds, even from off-center hits, leaving putts closer to the hole.

Ai-One Insert

Designed using Artificial Intelligence, we've created contours on the Aluminum backer of the insert which we co-mold to a White Hot Urethane striking surface to promote consistent ball speed across the face with the classic White Hot feel that Tour players and amateurs love.

Ai Window

Our designers and engineers developed a Panlite window, which is a unique automotive grade polymer, that allows us to showcase unique topology of the back of our insert.

SL 90 Shaft

A lightweight steel shaft with 20-30 grams (depending on the grip) of counterbalance weight in the butt end. This is an evolution of our Stroke Lab Weighting that will appeal to even more golfers.

New Beautiful Blasted Silver Finish Option

We have taken our most popular models of Ai-ONE and are making them available in a beautiful new silver finish that is classic and premium.

New Jailbird Options

We have taken our most popular shape and added an S neck option and switched things up with Versa 90 versions in DB and CH.

Interchangeable Front Weights

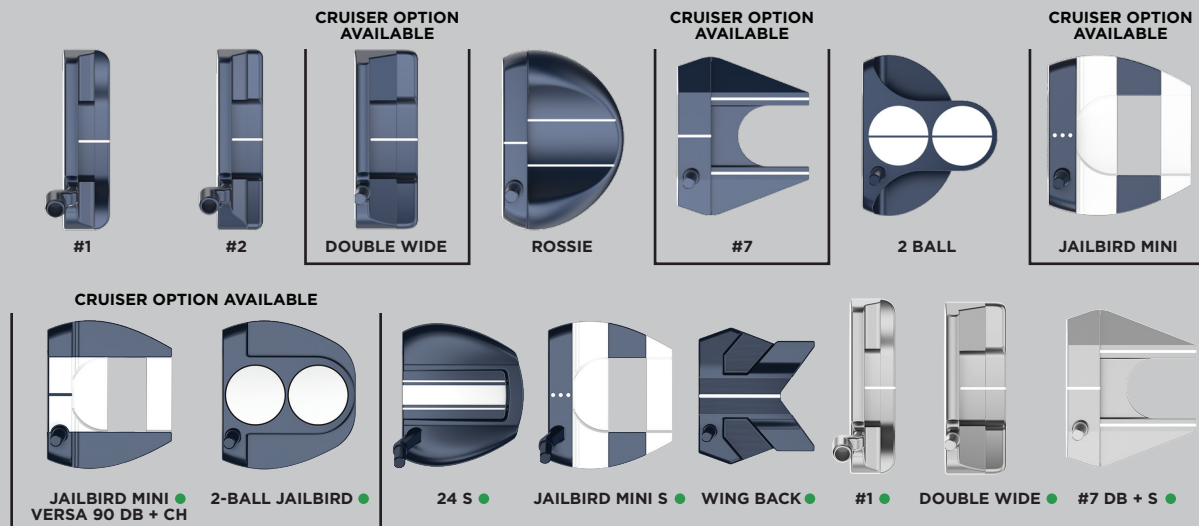

Available in 5, 10, 15 and 20 grams these removable weights allow you to dial in your head weight to your exact preference.

Ai-ONE • CRUISER

The Odyssey Ai-One Milled Cruiser line is a longer and heavier configuration that works well for a lot of golfers. All three of these models feature our Ai-One Milled insert which delivers more consistent ball speeds, even from off-center hits, leaving putts closer to the hole.

SL 140 shaft

These heavier steel shafts are designed to complement the heavier heads, longer grips and longer overall lengths of these models.
